Projects

10/2020 – 01/2021

Book Database website, Node.JS/HTML/CSS

- Developed a website for users to search for books, read abstracts, and view genres, authors, and reviews.
- Implemented user account creation and book list management features.

10/2021 – 02/2022

Airline Reservation System, MERN Stack

- Created a full-featured web application for booking and paying for flights.
- Implemented both domestic and international flight reservations.

11/2022 – 12/2022

MyReads, ReactJS

- Developed a bookshelf app for categorizing books by reading status as part of the Udacity React Development Nanodegree.
- Added a search page to facilitate book addition to the library.

Professional Experience

07/2022 – 08/2022

Front-End Intern, Link Development

- Implemented a website adhering to web coding standards with a focus on performance, SEO, and accessibility.
- Applied responsive web design principles to ensure compatibility across various devices and screen sizes.
- Worked within an Agile framework using Microsoft Azure DevOps.

Education

2009 – 2018

Nefertari American International School

2018 – 06/2023

German University In Cairo, Bachelor in Computer Engineering

11/2022 – 12/2022

React Development Nanodegree, Udacity
